Sprint Retrospective Meeting Minutes

Attendees: Emre, Juan, David, Carlos, Henry
Start time: 8:24 pm
End time: 9:13 pm

What went wrong?

- Did we do a good job estimating our team's velocity?

Yeah, pretty much. We got almost everything done that we planned, just a little off because some feedback came in late and a few setup things took longer than we thought. Next sprint, we'll leave a bit more room for stuff like that.

- Did we do a good job estimating the points (time required) for each user story?

For the easy story, yes. But the harder one with lots of moving parts ended up taking longer than we guessed. Next time, we should talk through those tricky stories more and maybe add a little buffer to be safe.

- Did each team member work as scheduled?

Yes overall. One person had a family emergency, but we worked around it and split tasks so it didn't slow us down too much.

What went right?

The team vibe was great this sprint. We communicated well, helped each other out, and finished almost everything on time. Even when problems came up, we stayed calm and figured them out together.

How to address the issues in the next sprint?

- How to improve the process?

We could use quick extra daily check-ins, even just five minutes, to share updates and call out blockers. It would keep everyone on the same page and make planning a lot smoother.

- How to improve the product?

We should do more testing before pushing changes to the main repo. Catching bugs earlier will make the product way more stable and save us headaches later.
